| <p>Program I<br/>(Gingivitis &amp; Localized pocketing)</p> <p>\$450</p> <p>Oral Hygiene Instruction \$56<br/>           Rota dent Toothbrush \$149<br/>           Localized Root Planning \$185<br/>           (1-3 Teeth or prophly)<br/>           Desensitizing Medication \$68<br/>           Re-Evaluation \$68<br/>           Fluoride \$98</p> <p><b>SAVE AT LEAST \$174</b></p>   | <p>Program III<br/>(Moderate Periodontitis)</p> <p>\$1700</p> <p>May require (LBR &amp; LAPT)<br/>           Oral Hygiene Instructions \$56<br/>           Rota Dent Toothbrush \$149<br/>           Root Planning 4+ teeth<br/>           Per quadrant \$255 (3-4) \$765 or more<br/>           Desensitizing Medication \$68<br/>           Localized delivery of anti-Microbial agents \$100/th<br/>           Re-Evaluation \$68<br/>           Prophly \$98<br/>           Tooth Splinting if Necessary \$523</p> <p><b>SAVE AT LEAST \$127</b></p>  | <p>Program IV<br/>(Advanced Periodontitis)</p> <p>\$2100</p> <p>Full mouth LBR and LAPT<br/>           Oral Hygiene Instructions \$56<br/>           Rota Dent Toothbrush \$149<br/>           Root Planning 4+ teeth<br/>           Per quadrant (\$255) \$1020<br/>           Desensitizing Medication \$68<br/>           Localized delivery of anti-Microbial agents \$100/th<br/>           Re-Evaluation \$68<br/>           Prophly \$98<br/>           Tooth Splinting if Necessary \$523<br/>           Gingivectomy<br/>           (4+ teeth per quad) \$705</p> <p><b>SAVE AT LEAST \$687</b></p> |
| <p>Program II<br/>(Early Periodontitis)</p> <p>\$950</p> <p>May require (LBR)<br/>           Oral Hygiene Instructions \$56<br/>           Rota Dent Toothbrush \$149<br/>           Root Planning 4+ teeth<br/>           Per quadrant \$255(2) \$510<br/>           Desensitizing Medication \$68<br/>           Localized delivery of anti-Microbial agents \$100/th<br/>           Re-Evaluation \$68<br/>           Prophly \$98</p> <p><b>SAVE AT LEAST \$99</b></p> | <p><b>Gingivitis &amp; Localized pocketing</b> – Inflammation of the gingiva characterized clinically by changes in color, gingival form, position, surface appearance and presence of bleeding and/or exudate.<br/> <b>Early Periodontitis</b> – Progression of the gingival inflammation into the deeper perio structures and alveolar bone crest. The usual perio probing depth is 3-4mm with slight loss of connective tissue attachment and slight loss of alveolar bone.<br/> <b>Moderate Periodontitis</b> - A more advanced stage of the above condition, with increased destruction of periodontal structures with noticeable loss of bone support possibly accompanied by an increase in tooth mobility. There may be furcation involvement in multi-rooted teeth.<br/> <b>Advanced Periodontitis</b> – Further progression of periodontitis with major loss of alveolar bone support usually accompanied by increased tooth mobility. Furcation involvement in multi-rooted teeth is likely.<br/> <b>LBR</b> – Laser Bacterial Reduction<br/> <b>LAPT</b> – Laser assisted periodontal therapy</p> |  |

OUR RECOMMENDATION FOR TREATMENT IS PROGRAM \_\_\_\_\_ . WE WILL BE HAPPY TO SUBMIT TO INSURANCE TO ALSO HELP WITH COST OF TREATMENT. PLEASE CALL TO SCHEDULE OR FOR ANY QUESTIONS 913-381-2600
